

# SUPER STICKER FUN!

10 activity pages to develop fine motor and early math skills

This set of Sticker Activity Pages includes *10 print-and-go activities* that will engage your children and give them **valuable fine motor practice** (peeling the stickers off the sheet and sticking them on the page) and also addresses a **variety of early math skills** (counting, size comparison, patterns, shapes, etc.). There are also a couple background scenes for your child to use their imaginations and stickers to complete a scene.

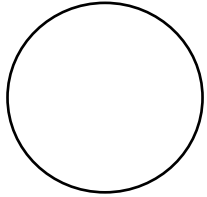

All you need is a printer and some stickers! These pages can be done again and again with different stickers. Stickers can be purchased at the Dollar Tree, Walmart, Target, or on Amazon.

If you use these activities with your kids, I'd love to see it! Please tag me on social media
